

The Alaska Scorecard has been revised to align with Strengthening the System: Comprehensive Integrated Mental Health Program Plan 2020-2024 (Strengthening the System). The Scorecard is a data measurement tool that examines the population health outcomes of Alaskans receiving care and services as described in Strengthening the System. Historically, the Scorecard measured the desired outcomes of the previous Comprehensive Plan: Moving Forward 2006-2011; it was published annually from 2008 until 2019 with indicators corresponding with Moving Forward. The Scorecard was revised in 2020 to include both new indicators and new narratives that are consistent with Strengthening the System. The revised scorecard was formatted to be consistent with the use of the Results-Based Accountability Framework (RBA). Key sections include:

- **Alaska Scorecard 2022:** this section provides the latest U.S. (if available) and Alaska data for each indicator, compared to baseline Alaska data available at the time of the 2020 revision.
- **Story Behind the Baseline:** this section takes stock of both the positive and negative forces that impact an indicator, as well as what is working to address it and what is not. It also includes a look at what the population or information being measured revealed prior to planned solutions (as described in the indicator) and includes information on research and causes.
- **What Works:** this section offers a brief explanation of what works to affect measurable improvements in the indicator. This includes information, research, and solutions along with some no- to low-cost strategies to mitigate the challenges the indicator highlights.

The Scorecard remains a concentrated document detailing the key issues impacting Alaska Mental Health Trust beneficiaries and was researched and produced by a group of leaders and planners representing the Alaska Department of Health, the Alaska Mental Health Trust Authority, boards and commissions, and other related state agencies. Trust beneficiaries are Alaskans who experience mental illness, developmental and intellectual disabilities, substance use disorders, Alzheimer's disease and related dementia, and traumatic brain injuries.

Due to the COVID-19 pandemic, some data sources experienced disruptions that impacted the availability or reliability of estimates for certain indicators. Some indicators may contain gaps where no data were available or where data is not directly comparable to previous years due to reporting issues. Every effort was made to ensure that the data contained in this report are up to date and accurate at the time of publication. The Scorecard work group will continue to monitor indicators for data quality issues.

ALASKA SCORECARD 2022

Key Issues Impacting Alaska Mental Health Trust Beneficiaries

INDICATOR	LATEST U.S. DATA	LATEST ALASKA DATA	BASELINE ALASKA DATA	CHANGE FROM BASELINE
EARLY CHILDHOOD				
1. Percentage of children who received a developmental screening using a parent-completed screening tool in the past year (ages 9 months to 35 months)	34.8% (2020-2021)	42.0% (2020-2021)	47.9% (2018-2019)	-5.9%
2. Percentage of incoming students who regulate their feelings and impulses 80% of the time or more (grades K-1)	*	47.1% (2021-2022)	49.1% (2019-2020)	-2.0%
3. Percentage of women who recently delivered a live birth who have a strong social support system during the postpartum period	*	75.2% (2020)	73.0% (2018)	+2.2%
4. Mean index score of (12) indicators associated with child health and well-being that are present at birth	*	9.5 (2021)	9.6 (2019)	-0.1
HEALTHCARE				
5. Percentage of population without health insurance	8.6% (2021)	11.4% (2021)	12.2% (2019)	-0.8%
6. Rate of non-fatal fall injuries (rate per 100,000; ages 65+)	3,263.3 (2020)	3,951.3 (2021)	4,558.8 (2019)	-607.5
ECONOMIC AND SOCIAL WELL-BEING				
7. Percentage of rental occupied households that exceed 50 percent of household income dedicated to housing	24.2% (2021)	20.5% (2021)	18.6% (2019)	+1.9%
8. Rate of chronic homelessness (rate per 100,000)	38.3 (2022)	78.2 (2022)	44.9 (2020)	+33.3
9. Percentage of Alaskans who experience a disability that are employed	40.8% (2021)	46.8% (2021)	44.0% (2019)	+2.8%
10. Percentage of Alaskans living above 125% of the federal poverty level	84.6% (2021)	85.7% (2021)	85.6% (2019)	+0.1%
SUBSTANCE USE DISORDER PREVENTION				
11. Percentage of Alaskans needing but not receiving treatment at a specialty facility for substance use in the past year (ages 12+)	6.8% (2021)	10.0% (2021)	8.9% (2018-2019)	+1.1%
12. Percentage of Alaskans who received mental health services in the past year (ages 18+)	16.9% (2021)	19.0% (2021)	17.1% (2018-2019)	+1.9%
13. Rate of alcohol-induced mortality (rate per 100,000; age-adjusted)	14.4 (2021)	40.6 (2021)	23.7 (2019)	+16.9
SUICIDE PREVENTION				
14. Rate of intentional self-harm/suicide attempt emergency department visits (rate per 100,000; age-adjusted)	40.5 (2020)	133.1 (2021)	122.3 (2019)	+10.8
15. Rate of intentional self-harm/suicide deaths (rate per 100,000; age adjusted)	14.1 (2021)	31.0 (2021)	28.8 (2019)	+2.2
16. Rate of intentional self-harm/suicide deaths (rate per 100,000; ages 15-24)	14.5 (2021)	63.3 (2021)	57.8 (2019)	+5.5
