## General Variance Application Instructions

1. Identify the regulation you are requesting the variance for. (example - 7 AAC 75.210 (c) (2))
2. Explain why you are not able to meet the regulations you identified in #1.
3. Identify the amount of time you would like this variance to be approved for. (The Department may not approve a variance beyond the Home's current licensing period. When the license expires, the variance will need to be renewed with the Home's license. This will require you to submit a new variance request)
4. Identify any alternative ways the regulation you identified in #1 could be complied with.
5. Since the Home is requesting a variance for the regulation in #1, the Home needs to submit a plan that explains how they will ensure the health, welfare, and safety of the residents will be protected.
6. Submit a plan showing how the Home intends to comply with the regulation identified in #1 and therefore will no longer need the variance. (Keep in mind there are some variances where the Home may never be able to comply with the regulation identified in #1 – talk with your Licensing Specialist if you have questions about this)
7. Submit an assurance that the conditions that would be present, since the Home cannot comply with the regulation identified in #1, would not present an imminent danger to the health, safety, or welfare of the residents.
8. If the regulation identified in #1 is related to fire safety, or is also required by another state of Municipal agency, then the Home needs to submit documentation showing those other agencies have reviewed and approve the Home's request for a variance of the regulation identified in #1.
9. Submit a list of the residents this variance request would affect.
10. Submit documentation that all the residents and/or guardians have or will be informed of the Home's variance request, what the variance is for, and how to contact the department to provide comment.
11. If the Department has asked you to submit anything else, you will list it here.
