Infection Control Assessment Tool for Hemodialysis Facilities

This tool is intended to assist in the assessment of infection control programs and practices in dialysis facilities. In order to complete the assessment, direct observation of infection control practices will be necessary. To facilitate the assessment, health departments are encouraged to share this tool with facilities in advance of their visit.

Dialysis facilities that report to NHSN complete an *Outpatient Dialysis Center Practices Survey* each year. The survey responses can be accessed in NHSN or the facility can be asked to retrieve and print their completed NHSN survey in advance of the site visit. The elements included on this assessment tool are intended to complement the NHSN survey. For facilities that do not report to NHSN, consider asking the facility to complete the practice elements of the survey.

Overview

Section 1: Facility Demographics

Section 2: Infection Control Program and Infrastructure

Section 3: Direct Observation of Facility Practices

Section 4: Infection Control Guidelines and Other Resources

Infection Control Domains for Gap Assessment

- I. Infection Control Program and Infrastructure
- II. Infection Control Training, Competency, and Audits
- III. Healthcare Personnel (HCP) Safety
- IV. Surveillance and Disease Reporting
- V. Respiratory Hygiene/Cough Etiquette
- VI. Personal Protective Equipment (PPE)
- VII. Environmental Cleaning
- VIII. Dialyzer Reuse and (if applicable) Reprocessing
- IX. Hand Hygiene
- X. Catheter and other Vascular Access Care
- XI. Injection Safety

Section 1: Facility Demographics		
Facility Name (for health department use only)		
NHSN Facility Organization ID (for health department use only)	☐ N/A because not CMS-certified or other reason, specify:	
State-assigned Unique ID		
Date of Assessment		
Type of Assessment	☐ On-site ☐ Other (specify):	
Rationale for Assessment (Select all that apply)	 ☐ Outbreak ☐ Input from ESRD Network or state survey agency ☐ NHSN data Specify: ☐ BSI ☐ Other NHSN data, specify: ☐ Other reason (specify): 	
Is the facility affiliated with a hospital?	 ☐ Yes (specify): (for health department use only) ☐ No If yes, who provides staffing for the facility? ☐ Hospital staff ☐ Contract with a dialysis company ☐ Other (specify): 	
Does the facility belong to a dialysis chain?	☐ Yes (specify chain below) ☐ DaVita ☐ Fresenius Medical Care ☐ Dialysis Clinic, Inc. (DCI) ☐ Other (specify): ☐ No	
What services are offered at the facility? (Select all that apply)	 □ Adult in-center hemodialysis □ Pediatric in-center hemodialysis □ Home hemodialysis □ Nocturnal hemodialysis □ Peritoneal dialysis □ Inpatient hemodialysis (in addition to outpatient hemodialysis) 	
What is the typical patient census? (include all dialysis patients cared for by the facility)	□ 1-25 □ 76-100 □ >200 □ 26-50 □ 101-150 □ 51-75 □ 151-200	

Section 2: Infection Control Program and Infrastructure

I.	. Infection Control Policies and Infrastructure		
	Elements to be assessed	Assessment	Notes/Areas for Improvement
1.	What training does the person in charge of infection control at the facility have?	O Certified in Infection Control (CIC)	
	Select the best answer	O Other training in infection control (specify):	
		O No specific training in infection control	
		O Not Applicable (no person in charge of infection control at the facility)	
2.	Is the facility participating in their ESRD Network Healthcare-Associated Infection (HAI) Quality Improvement Activity (QIA)?	O Yes O No	
3.	Has the facility participated in the CDC Dialysis BSI Prevention Collaborative?	O Yes O No	
4.	In the past 2 years, has the facility participated in any other intensive program focused on HAI prevention? (e.g., clinical trial, company-led quality improvement	O Yes (specify):	
	project)	O No	
5.	Does the facility have a system for early detection and management of potentially	O Yes (specify):	
	infectious persons at initial points of patient encounter?	O System applies at (or prior to) point of facility check-in	
No	ote: System may include taking a travel history, assessing for diarrhea or draining	O System applies when patient arrives in dialysis treatment	
	infected wounds, and elements described under respiratory hygiene/cough etiquette.	O No	
6.	Does the facility have a policy/protocol for implementing Contact Precautions when warranted?	O Yes O No	
No	ote: CDC does not routinely recommend Contact Precautions for multidrug resistant organisms (MDROs) in dialysis clinics.		
	However, in certain circumstances (e.g., known or suspected MDRO transmission),		
	Contact Precautions may be necessary.		<u> </u>

l.	I. Infection Control Policies and Infrastructure, continued		
	Elements to be assessed	Assessment	Notes/Areas for Improvement
7.	Are there signs posted in the facility that encourage patients to take an active role in and express their concerns about facility infection control practices?	O Yes O No	O Visually confirmed
	Visual confirmation suggested. Consider if the facility encourages this in other ways.		
8.	Facility provides standardized education to all patients on infection prevention topics: i. Vascular access care ii. Hand hygiene iii. Risks related to catheter use iv. Recognizing signs of infection v. Instructions for access management when away from the dialysis unit Facility should be able to provide examples of education materials.	i. O Yes O No ii. O Yes O No iii. O Yes O No iv. O Yes O No v. O Yes O No	
9.	What is the distance separating adjacent dialysis treatment stations? Involves observation. Select 2 adjacent and representative stations. Measure the closest distance between machine/chair/objects in one station and the next. If computer terminals are embedded in and shared between stations, the distance is zero.	 O < 3 feet O Embedded/shared computer terminal O ≥ 3 feet and <6 feet O ≥ 6 feet 	O Visually confirmed
	a. If embedded/shared computer terminal, what is the policy/protocol for routinely cleaning the embedded/shared computer terminal? Select the best answer	 Computer terminal is cleaned after each patient Computer terminal is cleaned after each shift Computer terminal is cleaned at the end of each day Other (specify): N/A, facility does not have a policy/protocol for routinely cleaning the computer terminal 	

I. Infection Control Policies and Infrastructure, continued Notes/Areas for Elements to be assessed **Assessment Improvement** 10. Does the facility have an isolation room that is O Yes O No O Visually confirmed available for isolation of conditions other than hepatitis B? (i.e., not currently in use for hepatitis B patients)? Visual confirmation suggested. 11. Does the facility use hemodialysis machine O Yes O No Waste Handling Option (WHO) ports? Note: The WHO port is a machine port used for prime waste. a. If **Yes**, does the facility have a policy/protocol O Yes O No in place for disinfecting the WHO port? O Not Applicable (WHO ports If Yes, consider how is the policy implemented are not used at the facility) and enforced. 12. Are patients in the facility ever "bled onto the O Yes O No machine" (i.e., where blood is allowed to reach or almost reach the prime waste receptacle or WHO port)? Note: This practice is discouraged because it can result in patient blood loss and blood contamination of the environment.

II. Infection Control Training, Competency, and Audits Notes/Areas for Elements to be assessed **Assessment Improvement** Facility provides job-specific training to healthcare personnel (HCP) on infection prevention policies and procedures: i. O Yes O No i. Upon hire, prior to provision of care ii. Annually ii. O Yes O No Note: This includes those employed by outside agencies and available by contract or on a volunteer basis to the facility. If Yes, facility should be able to provide examples of training. Facility assesses and documents competency with job-specific infection prevention policies and procedures: i. Upon hire, prior to provision of care i. O Yes O No ii. Annually ii. O Yes O No Does the facility routinely conduct O Yes (facility should be able to show audits of staff infection control results of these audits) practice? O No a. If Yes, does the facility provide O Yes (facility should be able to feedback on adherence to clinical provide examples of feedback) staff? O No O Not applicable (no audits conducted) Does the facility routinely use O AHRQ/CMS Checklist Tools standardized tools for educating staff and/or assessing practice? O CDC Tools O Corporate Tools (Select all that apply) O No standardized tools used Should be able to view tools in the facility.

II. Infection Control Training, Competency, and Audits Notes/Areas for Assessment Elements to be assessed Improvement O CDC Video: Preventing BSIs in a. If CDC tools, indicate the tool(s) used Outpatient Hemodialysis Patients: **Best Practices for Dialysis Staff** (Select all that apply) O CDC Approach to BSI Prevention in Dialysis Facilities (i.e., Core Interventions for Dialysis BSI Prevention) O CDC Hemodialysis Central Venous Catheter Scrub-the-Hub Protocol CDC Dialysis audit tools: O Hand hygiene O Catheter connection & disconnection O Catheter exit site care O Arteriovenous fistula & graft cannulation and decannulation O Injectable medication preparation & administration O Routine disinfection of dialysis station CDC Dialysis checklists: O Catheter connection & disconnection O Catheter exit site care O Arteriovenous fistula & graft cannulation and decannulation O Injectable medication preparation & administration O Routine disinfection of dialysis station

O Other (specify):

O N/A, no CDC tools used

III.	Healthcare Personnel (HCP) Safety			
	Elements to be assessed	Asses	sment	Notes/Areas for Improvement
1.	Does the facility provide post-exposure evaluation and follow- up, including prophylaxis as appropriate, to healthcare personnel (HCP) at no cost following an exposure event?	O Yes	O No	
2.	Does the facility track HCP exposure events, evaluate event data and develop/implement corrective action plans to reduce incidence of such events?	O Yes	O No	
3.	Does the facility offer hepatitis B vaccine to personnel who may be exposed to blood or body fluids through their job duties?	O Yes	O No	
4.	Does the facility offer influenza vaccine to all personnel?	O Yes	O No	
5.	Does the facility conduct baseline tuberculosis (TB) screening of HCP?	O Yes	O No	
6.	Does the facility have work-exclusion policies that encourage reporting of illnesses and do not penalize with loss of wages, benefits, or job status?	O Yes	O No	
7.	Does the facility educate HCP on prompt reporting of illness or job-related injury to supervisor and/or occupational health?	O Yes	O No	

IV.	Surveillance and Disease Reporting		
	Elements to be assessed	Assessment	Notes/Areas for Improvement
1.	Does someone <i>in the facility</i> know the facility's bloodstream infection (BSI) rate in NHSN or BSI standardized infection ratio (SIR)?	O Yes O No O Not Applicable (Data are not reported to NHSN)	
	a. If Yes , does the facility share rate data with front-line clinical staff?	O Yes O No O Not Applicable (Data are not reported to NHSN)	
2.	Does the facility have a policy that mandates blood culture collection <i>before</i> antimicrobial administration any time a BSI is suspected?	O Yes O No	
	If yes, consider how is the policy implemented and enforced		
3.	Does the facility conduct routine screening of hemodialysis patients for hepatitis C antibody at the recommended interval?	O Yes, on admission and every 6 months thereafter for susceptible patients O No	
4.	Does the facility know how to report clusters of infections, adverse events, or a new hepatitis B/C case to public health?	O Yes, knows what to report and how O No	
5.	Does the facility have a system in place to communicate infection or colonization with a multidrug resistant organism (MDRO) to other healthcare facilities upon transfer?	O Yes O No	

	Elements to be assessed	Assessment	Notes/Areas for Improvement		
ln ı	non-clinical areas:				
1.	Does the facility have signs posted at entrances with instructions to patients with symptoms of respiratory infection to: • cover their mouth/nose when coughing or sneezing? • use and dispose of tissues? • perform hand hygiene after contact with respiratory secretions?	O Yes O No	O Visually confirmed		
2.	Does the facility provide a means for patients to perform hand hygiene in or near waiting areas?	O Yes O No	O Visually confirmed		
3.	Does the facility provide space and encourage persons with symptoms of respiratory infection to sit as far away from others as possible?	O Yes O No	O Visually confirmed		
4.	Does the facility provide tissues and notouch receptacles for disposal of tissues?	O Yes O No	O Visually confirmed		
	Applies during periods of increased respiratory infections in the community	O Not Applicable (Not a period of increased respiratory infections)			
5.	Does the facility offer facemasks upon facility entry to patients with symptoms of respiratory infection?	O Yes O No	O Visually confirmed		
	Applies during periods of increased respiratory infections in the community	O Not Applicable (Not a period of increased respiratory infections)			
In o	In clinical areas:				
6.	Does the facility have the ability to separate symptomatic patients (by at least 6 feet) from other patients and their stations during dialysis treatment?	O Yes O No	O Visually confirmed		

VI.	Personal Protective Equipment (PPE)		
	Elements to be assessed	Assessment	Notes/Areas for Improvement
2.	Facility provides job-specific training to HCP on proper selection and use of PPE: i. Upon hire, prior to provision of care ii. Annually Does the facility validate HCP competency with use	i. O Yes O No ii. O Yes O No	
	of PPE?	O Yes O No	
3.	Supplies necessary for adherence to PPE recommendations are available and located near point of use: i. Gloves ii. Gowns iii. Face Shields/Eye Protection iv. Face Masks Visual confirmation suggested.	i. O Yes O No ii. O Yes O No iii. O Yes O No iv. O Yes O No O Not Applicable (facility does not use face masks)	O Visually confirmed
4. <i>No</i>	Does the facility have a policy/protocol for staff to routinely change/launder gowns (in the absence of soilage)? te: This question applies to patients in the general treatment area, not patients in isolation.	O Yes O At the end of the shift O At the end of the day O Other (specify): O No	
VII.	Environmental Cleaning		
	Elements to be assessed	Assessment	Notes/Areas for Improvement
1.	Does the facility have written policies and procedures for routine cleaning and disinfection of environmental surfaces, including clearly defining responsible personnel? e: Policy and procedures should identify staff	O Yes O No	
	responsible for performing cleaning and disinfection as well as those responsible for selection and preparation of disinfectant solution(s).		
2.	Does the facility provide job-specific training to responsible personnel on environmental cleaning and disinfection upon hire, at least annually, and when policies/procedures change?	O Yes O No	
Not	e: If environmental cleaning is performed by contract personnel, facility should verify this is provided by contracting company.		

	Environmental Cleaning, continued	A	Notes / Augus for June 1
3.	Does the facility regularly audit (monitor and	Assessment	Notes/Areas for Improvement
5.	document) adherence to cleaning and disinfection procedures?	O Yes (facility should be able to show results of these audits)	
		O No	
4.	Does the facility have a policy/procedure for decontamination of spills of blood or other body fluids?	O Yes O No	
	a. If Yes , are supplies necessary to clean the blood spill (e.g., proper disinfectant or spill kit) readily available and located near point of	O Yes O No	O Visually confirmed
	use?	O Not Applicable (facility does not have a policy for decontamination	
	Visual confirmation suggested.	of spills of blood or other body fluids)	
5.	Does the facility have a policy/procedure for routinely emptying AND cleaning reusable waste containers (e.g. leakproof containers used for disposal of used dialyzers and tubing)?	i. O Yes O No	
	i. Emptying ii. Cleaning	ii. O Yes O No	
6.	Does the facility have policies and procedures to ensure reusable medical devices (e.g.,	O Yes O No	
	thermometers, stethoscopes, blood pressure cuffs) are cleaned appropriately between patients?	O Not Applicable (no reusable medical devices are used at the facility)	
7.	Does the facility have policies and procedures for routinely cleaning and disinfecting the following	i. O Yes O No	
	items: i. Dialysis Clamps	O Not Applicable (facility does not use dialysis clamps)	
	ii. Blood Glucose Monitor(s)	ii. O Yes O No O Not Applicable (facility does not use blood glucose	
	iii. Dialysate Conductivity/pH meter(s)	monitor(s)) iii. O Yes O No O Not Applicable (facility does not use dialysate conductivity/pH meter(s))	

VIII. Dialyzer Reuse and Reprocessing			
Elements to be assessed	Assessment	Notes/Areas for Improvement	
Does the facility reuse dialyzers? Note: If the facility reprocesses dialyzers onsite, consider performing observations of dialyzer reprocessing.	O Yes (specify): O Dialyzers are reprocessed on-site O Dialyzers are reprocessed off-site O No *If No, skip to Hand Hygiene*		
A. If Yes, complete the following section. Que or off-site.	O No *If No, skip to Hand Hygiene* estions 2 & 3 apply to all facilities that reuse dialy	zersreprocessing can be on-	
Does the facility document informed consent for patients who participate in dialyzer reuse? Visual confirmation suggested.	O Yes (facility should be able to provide informed consent document) O No O Not Applicable (Facility does not reuse dialyzers)	O Visually confirmed	
3. Does the facility have policies and procedures to ensure that dialyzers are cleaned and reprocessed appropriately prior to reuse? Note: If reprocessing is performed off-site, facility policies and procedures should address safe handling of used dialyzers prior to reprocessing and assessment of disinfection process after reprocessing.	O Yes O No O Not Applicable (Facility does not reuse dialyzers)		
B. If answered Yes to Question 1 and dialyzer	rs are reprocessed on site, complete the following g on-site. *Consider performing observations of c		
4. Does the facility train personnel responsible for reprocessing dialyzers on proper selection and use of PPE and recommended steps for reprocessing equipment?	O Yes O No O Not Applicable (Facility does not reuse dialyzers or dialyzer reprocessing performed off-site)		
5. Does the facility test the competency of personnel responsible for reprocessing dialyzers upon hire and at least annually?	O Yes O No O Not Applicable (Facility does not reuse dialyzers or dialyzer reprocessing performed off-site)		
6. Does the facility regularly audit (monitor and document) adherence to reprocessing procedures and provide feedback to personnel regarding their performance?	O Yes (facility should be able to show results of these audits) O No O Not Applicable (Facility does not reuse dialyzers or dialyzer reprocessing performed off-site)		
7. Does the facility perform routine maintenance for reprocessing equipment (e.g., automated reprocessors) by qualified personnel in accordance with manufacturer instructions? Confirm maintenance records are available.	O Yes O No O Not Applicable (specify): O Only manual reprocessing methods used O Facility does not reuse dialyzers or dialyzer reprocessing performed off-site		

IX. Hand Hygiene		
Elements to be assessed	Assessment	Notes/Areas for Improvement
Supplies necessary for adherence to hand hygiene recommendations are available and located near point of use.		O Visually confirmed
i. Alcohol-based hand gel	i. O Yes O No	
ii. Handwashing sinks	ii. O Yes O No	
iii. Soap	iii. O Yes O No	
iv. Paper Towels	iv. O Yes O No	
Visual confirmation suggested.		
Does the facility perform observations of staff hand hygiene opportunities monthly (or more frequently)?	O Yes (facility should be able to show results of these observations) O No	
a. If Yes , does the facility provide feedback on adherence to clinical staff?	O Yes (facility should be able to provide examples of feedback) O No	
	O Not Applicable (No observations conducted)	

Х.	Catheter and other Vascular Access Care		
	Elements to be assessed	Assessment	Notes/Areas for Improvement
1.	Does the facility provide training specific to catheter/vascular access care and aseptic technique for staff handling catheters and/or vascular accesses?	O Yes (facility should be able to provide examples of training) O No	
2.	Does the facility perform observations of staff vascular access care and catheter accessing practices quarterly (or more frequently)?	O Yes (facility should be able to show results of these observations) O No	
	a. If Yes , does the facility provide feedback on adherence to clinical staff?	O Yes (facility should be able to provide examples of feedback) O No O Not Applicable (No observations conducted)	

X. Catheter and other Vascular Access Care, continued Elements to be assessed **Assessment** Notes/Areas for Improvement Facility performs staff competency assessments for vascular access care and catheter accessing: i. O Yes O No Upon hire, prior to provision of care ii. Annually ii. O Yes O No Does the facility use an alcohol-based O Yes O No O Visually confirmed chlorhexidine (>0.5%) solution as the first line skin antiseptic agent during dressing changes of catheters? Visual confirmation suggested. Does the facility routinely apply an antibiotic O Yes O Visually confirmed ointment or povidine-iodine ointment to catheter exit sites during dressing changes? O No (Specify:) Visual confirmation suggested. O No ointment used, but Note: CDC recommends using povidone iodine chlorhexidine dressing ointment or bacitracin/gramicidin/polymyxin used B ointment (not currently available in the United States). Triple antibiotic ointment O Neither ointment nor (bacitracin/neomycin/polymyxin B) is chlorhexidine dressing available and might have a similar benefit. used Mupirocin ointment is not recommended due to concerns about development of antimicrobial resistance. Does the facility routinely scrub catheter O Yes O No O Visually confirmed hubs with appropriate antiseptic after the caps are removed and before accessing the O Not Applicable (Facility uses catheter? needleless connector devices) Visual confirmation suggested. If N/A (facility uses needleless O Yes O No connector devices), does the facility O Not Applicable (Facility does routinely scrub the catheter hubs when not use needleless connector the needless connectors are removed? devices)

XI. Injection Safety	XI. Injection Safety		
Elements to be assessed	Assessment	Notes/Areas for Improvement	
Supplies necessary for adherence to safe injection practices are available and located near point of use.		O Visually confirmed	
Visual confirmation suggested.			
i. Sharps containers	i. O Yes O No		
ii. Needles/cannulae with safety feature	ii. O Yes O No		
2. Does the facility have policies/procedures to ensure sharps containers are emptied and/or changed on a regular basis and when needed?	O Yes O No		
3. Does the facility use a clean room that is physically separate from the treatment area for storage and preparation of injectable medications? Visual confirmation suggested.	O Yes O No	O Visually confirmed	
a. If No , is there a room available in the facility that could be used for storage and preparation of injectable medications?	O Yes O No		
4. Does the facility have a policy/procedure for routinely cleaning surface(s) where injectable medications are prepared?	O Yes O No		
5. Does the facility use manufacturer pre- filled saline syringes or single-use saline vials for flushes?	O Yes O No (specify):	O Visually confirmed	
Visual confirmation suggested.	O Flushes are drawn from the patient's designated saline bag used for dialysis		
	O Flushes are drawn up from the patient's dialysis line		
	O Flushes are drawn from a common saline bag used for all patients		
	O Other (specify):		

Section 3: Direct Observation of Facility Practices

Certain infection control lapses (e.g., reuse of syringes on more than one patient or to access a medication container that is used for subsequent patients; reuse of lancets) can result in bloodborne pathogen transmission and should be halted immediately. Identification of such lapses warrants appropriate notification and testing of potentially affected patients.

*National Healthcare Safety Network (NHSN) minimum plan requirements for each audit type are included as a number of minimum observations to consider.

Infection Control Observations				
Infection Control Observations	Adherence: num/denom	Gaps Identified	Comments	
(i) Hand hygiene		O Yes		
http://www.cdc.gov/dialysis/PDFs/collaborative/He modialysis-Hand-Hygiene-Observations.pdf *NHSN minimum requirement = 30 observations		O No		
(ii) Catheter connection and disconnection		O Yes		
http://www.cdc.gov/dialysis/PDFs/collaborative/Cat heter-Connection-Disconnection-Observations.pdf *NHSN minimum requirement = 10 observations		O No		
(iii) Catheter exit site care		O Yes		
http://www.cdc.gov/dialysis/PDFs/collaborative/Cat heter-Exit-Site-Care-Observations.pdf *NHSN minimum requirement = 5 observations		O No		
(iv) Arteriovenous fistula & graft cannulation		O Yes		
http://www.cdc.gov/dialysis/PDFs/collaborative/AV- Fistula-Graft-Can-Decannulation-Observations-AT.pdf *NHSN minimum requirement = 10 observations		O No		
(v) Injectable medication preparation		O Yes		
http://www.cdc.gov/dialysis/PDFs/collaborative/He modialysis-InjectionSafety-Observations.pdf *NHSN minimum requirement = 5 observations		O No		
(vi) Injectable medication administration		O Yes		
http://www.cdc.gov/dialysis/PDFs/collaborative/He modialysis-InjectionSafety-Observations.pdf *NHSN minimum requirement = 5 observations		O No		
(vii) Routine disinfection of dialysis station		O Yes		
http://www.cdc.gov/dialysis/PDFs/dialysis-Station- Disinfect-Tool-7-2015.pdf *NHSN minimum requirement = 10 observations		O No
