

## **Application Form**

## Healthy Alaskans Advisory Team and Healthy & Equitable Communities Committee

Healthy Alaskans 2030 is the state health improvement plan and initiative that seeks to address the most significant health concerns that face Alaskans. The purpose of the Healthy Alaskans Advisory Team is to provide guidance and recommendations for the implementation of Healthy Alaskans 2030 Strategic Plan. The Healthy and Equitable Communities Advisory Committee seeks to address health issues impacting high-risk and underserved Alaskans, as well as the implementation of the Healthy and Equitable Communities Strategic Plan. Both plans are designed to support equitable access to opportunities for all Alaskans to lead healthy lives. The State of Alaska Department of Health and Social Services and the Alaska Native Tribal Health Consortium are seeking advisory members who represent the diverse organizations, communities, and voices throughout Alaska's health system, and bring a broad set of expertise and input to these efforts. Members can choose to serve on one team or both.

Roles of the Advisory Team and Healthy & Equitable Communities Committee include:

- 1. Raising awareness about the improvement plan of both entities.
- 2. Promoting or directly engagement in implementation of plan strategies and actions.
- 3. Guiding the development of materials, structures and processes to improve the plans implementation efforts.
- 4. Monitoring progress of plan targets, strategies, and actions.
