VFC Refrigerator Temperature Log - F°Facility Name_Required temperature range: 36.0° and 46.0°Unit Location_

Month/Year _____

VFC PIN

Document day of the week, time, and initials. Review temperature monitoring device alarm and document status with a Y (yes-alarm is triggered) or N (no-alarm is not triggered). Record current, min, and max temperatures once at the start of each workday. Take action if alarm was triggered.

	Day of Month	Day of Week	Time	Initials	Alarm Y or N	Current	MIN	MAX	MIN/MAX
I	Example	Μ	8:00am	NN	Y	37.7	33	43.5	
	1								<i>TOO COLD or WARM</i> (i.e., 35.9° or 46.1°)
	2								(1.0., 55.9 01 40.1)
	3								✓ Store the vaccine at
	4								the appropriate
	5								temperature range
	6								
	7								\checkmark Mark the vaccines
	8								as "Do Not Use"
	9								until vaccine viability is
	10								determined
	11								
	12								✓ Contact
	13								manufacturer(s) to
	14								determine viability
	15								✓ Pull any non-viable
	16								vaccine and process
	17								return
	18								
	19								$\checkmark \text{ Write the excursion}$
	20								date on viable vaccine
	21								vacenie
	22								✓ Email the
	23								Temperature
	24								Excursion Report
	25								(found on
	26								Immunization Program website) to
	27								vfc@alaska.gov
	28								
	29
