1906 of the Act

Enrollment of Individuals under Group Health Plans

The Division of Medical Assistance may enroll individuals under group health plans after making a case-by-case determination of cost effectiveness.

In making a cost effectiveness determination, the Division of Medical Assistance will use the method provided in section 3910 of the State Medicaid Manual except that the Division may compare an individual's historical Medicaid costs, group health plan costs, adjustments for coinsurance and deductibles, and administrative costs if these historical costs are representative of costs likely to be incurred in the future.
