

**Alaska Section of Epidemiology
Infectious Diseases Reportable by LABORATORIES**

IMMEDIATE REPORTING (PUBLIC HEALTH EMERGENCIES)

Bacillus anthracis
Burkholderia mallei
Burkholderia pseudomallei
Clostridium botulinum or botulinum toxin
Corynebacterium diphtheriae
Francisella tularensis
Hemorrhagic fever viruses
Influenza virus, suspected novel strains
Middle East Respiratory Syndrome (MERS) coronavirus
Neisseria meningitidis

Poliovirus
Rabies virus
Rubella virus
Rubeola (measles) virus
Severe Acute Respiratory Syndrome (SARS) coronavirus,
suspected novel strains
Variola (smallpox) virus
Yellow fever virus
Yersinia pestis

**To report a Public Health Emergency:
Business Hours 907-269-8000 • After Hours 800-478-0084**

ROUTINE REPORTING (WITHIN 2 WORKING DAYS)

Antibiotic-resistant organisms of national significance,
including *Candida auris* and carbapenem-resistant
organisms
Arboviruses
Bordetella pertussis
Borrelia burgdorferi
Brucella species
Campylobacter species
Chlamydomphila psittaci
Chlamydia trachomatis
Coxiella burnetii
Cryptosporidium species
Cyclospora
Diphyllobothrium species
Shiga toxin-producing *Escherichia coli* (STEC)
Echinococcus species
Giardia species
Haemophilus ducreyi
Haemophilus influenzae from normally sterile body fluid or site
Hantavirus
hepatitis A, B, C, D or E virus, tests that shall be reported
include
(A) all reactive viral hepatitis screening tests and associated
confirmatory test results;
(B) tests used to establish the presence of hepatitis B or C
viruses, including virologic, nucleic acid (DNA or RNA),
or other viral load detection test results, both
detectable and undetectable; and
(C) genotype results
Human immunodeficiency virus (HIV) tests that shall be
reported include
(A) tests confirming human immunodeficiency virus
infection;

(B) tests used to establish the presence of human
immunodeficiency virus, including serologic, virologic,
nucleic acid (DNA or RNA), or other viral load
detection test results, both detectable and
undetectable;
(C) Genotype results and associated HIV nucleotide
sequence data; and
(D) CD4+ (T4) lymphocyte counts and CD4+ (T4) percent
of total lymphocytes results of any value

Influenza virus
Legionella species
Leptospira species
Listeria monocytogenes
Mumps virus
Mycobacterium leprae
Mycobacterium tuberculosis
Neisseria gonorrhoeae
Plasmodium species
Prions
Respiratory syncytial virus (RSV)
Salmonella species
SARS-CoV-2
Shigella species
Streptococcus agalactiae from normally sterile body fluid or
site
Streptococcus pneumoniae from normally sterile body fluid or
site
Streptococcus pyogenes from normally sterile body fluid or site
Taenia species
Treponema pallidum
Trichinella species
Varicella virus, when associated with a death
Vibrio species
Yersinia enterocolitica or *Yersinia pseudotuberculosis*

To report, call 907-269-8000; or fax 907-561-4239. Report Forms are available at:

<https://health.alaska.gov/dph/Epi/Pages/pubs/conditions/crforms.aspx>
