What is CUBS?

CUBS stands for the Childhood Understanding Behaviors Survey and is a three-year follow-up to the Alaska Pregnancy Risk Assessment Monitoring System (PRAMS) survey. PRAMS sends a survey to approximately one of every six mothers of newborns in Alaska, and CUBS attempts follow-up with all mothers who completed PRAMS and whose infant was living with them at that time. The purpose of CUBS is to collect information about the health, behaviors, and early childhood experiences of children in Alaska before they enter school.

Among mothers who were sent the CUBS survey in 2008, 49% responded. Their answers were weighted to represent all mothers of 3-year-old children who were born in Alaska in 2005. The average child age at the time the mother responded to CUBS was 36 months (range 35-40 months).

For more information about CUBS, visit www.epi.hss.state.ak.us/mcheipi/cubs/.

For questions or for specific data requests, contact Margaret Blabey, CUBS Program Coordinator, at 907-269-5657 or margaret.blabey@alaska.gov.
