

MEDICARE – PART D Prescription Drug Coverage

2023 Alaska Options

Oct. 15 through Dec. 7 is the Medicare Part D Open

Enrollment Period. This is the ideal time for all people on Medicare to consider whether they have the best prescription drug coverage available for the following year. Other times to enroll in Part D are: when you are first eligible for Medicare and join during your Initial Enrollment Period (the 7 months around your 65th birthday month, or the 25th month of receiving a Social Security Disability Insurance benefit), during a Special Enrollment Period (SEP) such as when you've lost creditable prescription coverage from an employer or union, you've moved from your service area, or you moved into or out of (or currently live in) a long-term care facility.

What is the “best plan?” The plan that:

- ✓ covers your prescriptions on the plan's formulary (list of covered medications)
- ✓ works with your pharmacy
- ✓ offers the lowest cost on your medications

All Part D plans have a fixed monthly premium. Medicare beneficiaries may pay a deductible and pay a copayment cost at the pharmacy, or to the plan if using their mail-order service.

Since your medication needs may vary each year and the plan's pricing and list of covered medications (formulary) can change, you should compare plans each year during the Open Enrollment Period. You can use www.medicare.gov or check with your plan to see if your medications will be covered next year.

Part D Benefit Periods

1. **Deductible Period:** the beneficiary pays 100% of prescription costs until the deductible is met. The maximum deductible for 2023 is \$505.
2. **Initial Coverage Period:** the cost of covered drugs is shared, 25% by the beneficiary and 75% by the plan.
3. **Coverage Gap (donut hole) Period:** once the beneficiary and plan have paid \$4,660 for the year, the beneficiary pays 25% for generic and 25% for brand-name drugs until they have spent \$7,400.
4. **Catastrophic Benefit Period:** the beneficiary pays a co-pay of \$4.15 per generic and \$10.35 for brand-name drugs (or 5% of the drug's total cost, whichever is greater).

Late Enrollment Penalty

A beneficiary who does not sign up for Part D within their Initial Enrollment Period and does not have other creditable drug coverage may be subjected to a Late Enrollment Penalty if they enroll in a Part D plan later.

The penalty is calculated by taking 1% of Medicare's base beneficiary premium for Part D and multiplying it by the number of full months that the beneficiary did not have Part D or other creditable drug coverage. That amount is rounded to the nearest \$0.10 and added to the monthly premium of a Part D plan. The base premium may increase or decrease each year, so the penalty amount may increase or decrease also. For 2023, the base premium for Part D is **\$32.74**.

This project was supported, in part by grant number 90SPAG0082, from the U.S. Administration for Community Living, Department of Health and Human Services, Washington, D.C. 20201.
